## Choose one of the investment strategies below

Your investment strategies are outlined on the following pages. Choose the selection that works for you.

**IMPORTANT NOTE:** This investment election applies to your rollover and all future contributions. Investment allocation strategies are a convenient way of allocating your account among certain of the plan's individual investment options. Any investment allocation strategies included in these materials are not intended to be investment advice or recommendations to you and may or may not be appropriate for your circumstances. In applying investment allocation strategies to your individual circumstances, you should consider your other assets, income and investments as well as your risk tolerance. If you direct your contributions or current account balance to an investment allocation strategy, your contributions or account balance will be invested in each of the individual investment alternatives in the percentages indicated for the strategy. The plan may offer other investment options not included in the strategies and the individual investment alternatives included in the strategies may also be available on a stand-alone basis. The Investment Portfolio chart lists asset classes, along with their weightings in the allocation strategy. Additional investment options may exist that are not included in the portfolio. When selecting your investments, choose only **ONE** portfolio from any of the strategies, sign the form and you're done **OR** you can select individual investment options (under Option D) and build your own portfolio. See below for a complete list of options. The investment options available in this plan may change at the direction of the Plan Sponsor. Elections made on this form may be modified to follow the intent of those changes. Until you make your investment selection, your contributions will be invested in the Target Asset Allocation Investment Option listed below which has the target retirement date closest to your 65th birthday. If you are near, at or past your 65th birthday, your contributions will be invested in the target asset allocation investment option that shows no target retirement date. Following your enrollment, you will receive a transaction confirmation that will tell you specifically in which Target Asset Allocation Option your contributions have been invested. Subject to certain restrictions, you may redirect your contributions to any other investment option under the Plan at any time.

*Target Asset Allocation Investment Options are single solutions that offer professional management and monitoring as well as diversification all in one investment. Each investment option has an automatic process that invests more conservatively as retirement nears and the options are named to coincide with a particular retirement date. Your plan is designed to invest your contributions into one of these options as the default investment based on your date of birth and a projected retirement age of 65. You may always choose new investment options at any time.*
